Legal risks regarding securities regulations

21. There is a risk that in some jurisdictions the VST Tokens might be considered to be a security, or that it might be considered to be a security in the future. Vestarin does not give warranties or guarantees that VST Tokens are not a security in all jurisdictions. Each holder of VST Tokens shall bear its own legal or financial consequences of VST Tokens being considered a security in their respective jurisdiction. Every Purchaser is bound to check if acquisition and disposal of VST Tokens is legal in his jurisdiction, and by accepting this Agreement, each Purchaser undertakes not to use VST Tokens should their use not be legal in the relevant jurisdiction. If Purchaser establishes that the use of VST Tokens under this Agreement is not legal in his jurisdiction, You should not use the VST Tokens, not acquire them and should immediately stop using or possessing them if such case arises. Acquiring cryptographic Tokens for personal possession and exchanging them for other cryptographic Tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of Vestarin to provide VST Tokens and the Platform in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree certainty that VST Tokens are not legal in certain jurisdiction, Vestarin will either:

a) cease operations in that jurisdiction, or

b) adjust VST Tokens and the Platform in a way to comply with the regulation should that be possible and viable.

Risks associated with Ethereum

22. VST Tokens are based on Ethereum blockchain. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause the VST Tokens to malfunction or function in an unexpected or unintended manner. Ether, the native unit of

account of the Ethereum may itself lose value in ways similar to VST Tokens, and also other ways. More information about the Ethereum is available at <http://www.ethereum.org>.

Risk of unfavorable regulatory action in one or more jurisdictions

23. Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Ethereum network and associated blockchain networks and VST Tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital Tokens like VST Tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.

Risk of theft and hacking

24. Hackers or other groups or organizations may attempt to interfere with Your Third-party Wallet, the Website or the availability of VST Tokens and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks. You hereby agree that Vestarin shall have no liability for any such loss the Purchaser incur.

Risk of security weaknesses in the Website and/or VST Tokens source code or any associated software and/or infrastructure

25. There is a risk that the Website and VST Tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of VST Tokens.

Risk of weaknesses or exploitable breakthroughs in the field of cryptography

26. Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum, VST Tokens, the Platform, which could result in the theft or loss of VST Tokens.

Risk of mining attacks

27. As with other decentralized cryptocurrencies, Ethereum blockchain, which is used for the VST Tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, "selfish-mining" attacks, and race condition attacks. Any successful attacks present a risk to the VST Tokens, expected proper execution and sequencing of VST Tokens, and expected proper execution and sequencing of Ethereum contract computations in general. Despite the efforts of Vestarin and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining Attacks, as described above, may also target other blockchain networks, with which the VST Tokens interact with and consequently the VST Tokens may be impacted in that way to the extent, described above.

Risk of low or no liquidity

28. Even though there are currently online service available, which enable possibility of exchange of cryptographic tokens between themselves, and also, some of them enable exchange of cryptographic tokens for fiat money, there are no warranties and/or guarantees given that VST Tokens will be listed or made available for exchange for other cryptographic tokens and/or fiat money, and no guarantees are given whatsoever with the capacity (volume) of such potential exchange. It shall be explicitly cautioned, that such

exchange, if any, might be subject to poorly understood regulatory oversight, and Vestarin does not give any warranties in regard to any exchange services providers. Purchasers might be exposed to fraud and failure. In any case, Vestarin will not enable exchange of VST Tokens for other cryptographic tokens or for fiat currency. Purchaser may not at any given time be able to acquire or dispose of its VST Tokens due to lack of liquidity.

Risk of loss of value

29. Value of VST Tokens may fluctuate and their Purchasers might suffer loss in value of such acquired tokens. There might be different reasons that would cause unfavorable fluctuations of the value of the VST Tokens.

Risk of uninsured losses

30. VST Tokens are unlike bank accounts or accounts at some other financial institutions and are entirely uninsured.

Risk of malfunction in the Ethereum network or any other blockchain

31. It is possible that the Ethereum network or any other network, to which the VST Tokens are interacting with, malfunctions in an unfavorable way, including but not limited to one that result in the loss of VST Tokens.

Internet transmission risks

32. Purchaser acknowledge that there are risks associated with using the VST Tokens including, but not limited to, the failure of hardware, software, and Internet connections. Purchaser acknowledge that Vestarin shall not be responsible for any communication failures, disruptions, errors, distortions or delays You may experience when using the Website and VST Tokens, howsoever caused.

Unanticipated risks

33. Cryptocurrencies and blockchains are new and untested technology. In addition to the risks set forth here, there are risks that Vestarin cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

Insufficient interest in Vestarin, the Platform and VST Tokens

34. It is possible that Vestarin, VST Tokens or Platform will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of the Platform and usage of VST Tokens on it.

VST Tokens and the Platform, as developed, may not meet the Purchaser's expectations

35. The Platform is currently under development and may undergo significant changes before release. The Purchaser's expectations regarding the form and functionality of the Platform and VST Tokens may not be met upon release of new Website, deployment of the

Platform, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of VST Tokens.

Prohibited activities

36. You are prohibited from violating any law, statute, ordinance or regulation in our registered jurisdiction as well as your country or residency by using VST Tokens.
